

Objective: Digitalize the Corrective Action Request (CAR) process for TABLE EGG and DOP operations from initiation, response planning, implementation verification, through to closure with automated deadline calculations, approval routing, and monitoring dashboards.

REQUIREMENT:

Dashboard & Reporting Module — **Repeat offenses based on category and sub category, Open/Closed status, Response Time, Resolution Time, Frequency of CAR issuance**

PHASE I — CAR Initiation & Submission

Step 1: Open New CAR Form

- System auto-generates unique CAR Reference Number

Step 2: Select Issuing Context

- Issued to Farm/Department → Dropdown: All concerned dept
- Issued By → manual/user-populated
- Issued Date → Auto-populates today's date
- Complainant → User input (CUSTOMER)

Step 3: Select Category & Sub-Category

- Based on Issued To selection, relevant categories appear:
 - TABLE EGG - Production Related · Compliance & Standards · Logistics & Distribution Transport
 - DOP - Production Related · Compliance & Standards · Preparation & Distribution Transport · Sales & Order Management
- Sub-category dropdown updates automatically based on Category selection.

Step 4: Auto-Calculate Deadlines

- System looks up Response Timeline (Days) and CA Implementation Deadline (Days) from matrix below → auto-computes dates from Issued Date:
Response Deadline = Issued Date + Response Timeline (days)
Implementation Deadline = Issued Date + CA Implementation Timeline (days)

Step 5: Describe Problem & Attachments

- Details of Problem → Free text input
- File Attachments → Optional (photos, docs, evidence)

Step 6: Submit CAR

- Click SUBMIT CAR button
- System locks Phase I fields
- Notification/Flag sent to responsible department/users → CAR moves to Phase II

PHASE II — Response, Root Cause & Action Planning

Step 7: Interim Containment / Immediate Actions

- Date Start · Date End · Responsible Person
- Input: Immediate actions taken to contain issue

- *System captures timeline*

Step 8: Root Cause Analysis

- Responsible Person
- Input: Root Cause findings (text or attached file)

Step 9: Define Corrective Action

- Corrective Action Description → Type or attach document
- Date Start = Auto-fills = Interim Containment Date End
- Date End = Auto-calculated = Implementation Deadline (from Phase I matrix)
- Responsible Person

Step 10: Approval — Root Cause & Corrective Action

- If Supervisor submitted → Manager approves
- If Manager submitted → DH approves
- ☒ Approved → CAR moves to Phase III
- ☒ Rejected → Return to Phase II for revision
- Notification/Flag sent to responsible department

PHASE III — Implementation, Verification & Closure

Step 11: Submit Implementation Evidence

- Upload supporting files/photos proving actions completed
- Upload Date · Responsible Person

Step 12: Farm DH — Effectiveness Validation

- Farm Department Head reviews evidence → Effective?
 - NO → Return to Phase II (revise actions) – (Notification/Flag sent to responsible department)
 - YES → Forward to Issuing Department for final acceptance

Step 13: Issuing Department DH — Final Acceptance

- Reviews full record → Accept?
 - YES → CLOSE CAR → Status = CLOSED / ACCEPTED
 - NO → Status = OPEN / NOT ACCEPTED
 - System auto-flags both DH and Farm users
 - Enter New End Date
 - Define revised timeline & plan → Loop back to Step 11

PHASE II

PHASE III

TABLE EGG CAR MATRIX PROPOSAL				
Category	Sub-category	What to Report in this CAR Description / Common Issues	RESPONSE TIMELINE (DAYS)	TIMELINE CA IMPLEMENTATION TO DEADLINE FOR REVIEW (DAYS)
Production related	Shell Quality Defects	Cracked, broken, thin shell, wrinkled/rough shell, dirty/stained shells, abnormal shape, discoloration	3	10
	Internal Quality Defects	Watery/weak albumen, low Haugh units, discolored yolk, blood		

		spots, off-odor, mold, rotten eggs		
	Production / Flock-Related Quality	Sudden quality drop linked to flock health, nutrition, stress, or disease — persistent quality decline		
Compliance & Standards	Size / Weight & Grading Discrepancy	Wrong size classification, grading issue, mixed sizes within packaging	1	5
	Packaging & Labeling	Damaged cartons, wrong labeling, incomplete batch/expiry info, improper packaging causing breakage		
	Storage & Handling	Inventory Movement, incorrect data given during transfer of Table eggs, grades, labeling, batch/expiry dating, traceability, regulatory docs		
	Sanitation and maintenance	Logistics delivery and hauling vehicle hygiene, egg washing, egg grading and egg room sanitation and maintenance protocol, egg tray washing, Egg calibration.		
Logistics & Distribution Transport	Issuance & Delivery Errors	Cancellation of booked trips causing complaints of Logistic provider, wrong quantity, wrong delivery date, mixed customer orders, late Loading of eggs causing delay to delivery timeline, transit time, delivery timeliness, stacking/protection, breakages over the compliments, breakages due to poor handling and negligence	1	5

DOP CAR MATRIX PROPOSAL				
Category	Sub - Category	What to Report in this CAR	RESPONSE TIMELINE (DAYS)	TIMELINE CA IMPLEMENTATION TO DEADLINE FOR REVIEW (DAYS)
Production related	Hatchery Production & Hatch Rates	Low hatch %, poor chick yield, uneven hatching, delayed hatch, over/under production vs order	3	10
	Internal Biosecurity & Flock Health	Source breeder flock health concerns, isolation		

		gaps, biosecurity breaches, disease monitoring issues		
Compliance & Standards	Chick Quality & Uniformity	Weak/dehydrated chicks, navel defects, uneven size/weight, splayed legs, deformities, poor vitality at hatch	1	3
	Sexing & Strain Accuracy	Sexing errors, mixed batches, labeling mismatch or errors		
	Vaccination & Health Protocols	Incomplete/missed vaccinations, improper administration, missing records, wrong vaccine type, storage issues		
	Sanitation and maintenance	Logistics delivery vehicle hygiene, and PMS		
	Documentation & Certification Readiness	Missing health certificates, Delivery permits, hatchery delivery docs, traceability records		
Preparation and Distribution Transport	Preparation & Shipment Readiness	Delayed pull-out, improper holding/conditioning before dispatch, packaging issues, late and loading errors, transport arrangements	1	5
	Issuance & Delivery Errors	wrong quantity, mixed customer orders, stacking/protection, Unacceptable mortalities due to poor handling and negligence. Non-compliance to logistics checklist		
Sales & Order Management	Booking & Sales Cancellations	Cancellations Unjustified/last-minute sales order cancellations, cancellation after confirmation causing hatchery/planning losses, volume discrepancies between bookings and actual take-up	1	5
